

Institute for Systems Genomics

## Genome Ambassador Program

### Genome Ambassadors Promote Engagement Opportunities to Advocate for Increasing Diversity, Inclusion and Literacy in Genomics

#### Genome Ambassadors make an impact by:

- Progressing the field to achieve greater interest and diversity in the dynamic discipline of genomics
- Engaging with individuals outside of the field to increase public genomic literacy
- Developing mentorship networks for education and career growth
- Communicating science as an inclusive and accessible language

#### Members include undergraduate and graduate students, alumni, staff, and faculty. Genome Ambassadors represent many disciplines:

- |                               |                               |                          |
|-------------------------------|-------------------------------|--------------------------|
| • Health Care Genetics PSM    | • Biomedical Engineering      | • Psychological Sciences |
| • Diagnostic Genetic Sciences | • Medical Laboratory Sciences | • Kinesiology            |
| • Genetics and Genomics PhD   | • Pharmacy Studies            | • Sociology              |
| • Molecular and Cell Biology  | • Bioinformatics              | • Studio Art             |
| • Physiology and Neurobiology | • Allied Health Sciences      | • Economics              |

#### We offer in-person and virtual programs and events for learners of all ages. Follow or join us to learn more!

- Career Presentations/Fairs
- Lab Demos/Tours
- Campus Field Trips
- Topic-Focused Education
